PROFESSIONAL SUMMARY

MCA graduate (May 2026) and fresher (0-1 years) with a dual profile in software development and data analytics. As a Full Stack Developer (MERN) and Web Developer, I build responsive, customer-facing web applications and secure RESTful APIs using JavaScript (ES6+), TypeScript, React.js, Redux, Angular, RxJS, Node.js, Express.js, Python (FastAPI), Java (Spring Boot) and MongoDB/MySQL/PostgreSQL, with JWT authentication, role-based access, API testing (Postman, JUnit, Mockito) and OpenAPI/Swagger documentation. I also build cross-platform mobile apps (Flutter, React Native) and have hands-on Generative AI experience: LLM integrations with OpenAI APIs and LangChain, agentic workflows, tool-calling, prompt engineering and AI-assisted coding (ChatGPT, Claude, GitHub Copilot, Microsoft Copilot, Gemini, Lovable).

As a Data Analyst, I turn unstructured data into insights, action steps and compelling narratives using SQL, Python (Pandas, NumPy), Excel, Power BI and Tableau. Certified in Google Data Analytics and Microsoft Power BI (PL-300), with proven ability to clean, validate and model complex datasets, build interactive dashboards, and deliver KPI reporting across sales, churn, customer segmentation, credit card portfolio performance, retail banking SLAs and expense analytics, including exposure to insurance and lounge-access (membership services) analytics, ETL, A/B testing, statistical analysis and machine learning.

I also bring business and operations support skills: client and end-user query resolution, process SLA tracking, escalation management, expense claims and statement reconciliation, travel itinerary and meeting room coordination, calendar management, SOP/process map/SIPOC documentation, knowledge base and FAQ creation, and strong Microsoft Office skills. Interested in marketing operations (HTML, landing pages, email templates, ads/banner pages) and Maps team work (map layers, navigation and search services). Strong foundation in data structures, algorithms, OOP, DBMS and SDLC. Detail-oriented, self-starter, quick learner, creative problem-solver and team player with strong written and verbal communication; comfortable with Agile/Scrum, on-site work, rotational shifts (including 2 PM - 11 PM) and cross-functional collaboration; ready to join immediately.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Python, Java, C#, C, SQL, Dart, PHP (certification coursework), Kotlin (certification coursework)

Front-End & Web Markup: HTML, HTML5 (Hyper Text Markup Language: semantic markup, links, headings, lists, tables, forms, embedded images/media), CSS3, Flexbox, Grid, responsive design, mobile-first design, React.js, React Hooks, Redux, Angular, Angular CLI, RxJS, Bootstrap 5, Tailwind CSS, Axios, DOM manipulation, client-side form validation, UI/UX implementation, component-based architecture, third-party libraries and APIs

Mobile / Cross-Platform: Flutter, Dart, React Native, Kotlin (certification coursework), cross-platform mobile application development

Back-End & APIs: Node.js, Express.js, Python (FastAPI), Spring Boot, JPA, RESTful API design, API integration, OpenAPI/Swagger, JSON, authentication, validation, error handling, system integration, data interfaces

Databases: MongoDB (Mongoose), MySQL, PostgreSQL, SQL, NoSQL, basic database design

Generative AI & LLMs: LLM integrations, OpenAI APIs, LangChain, agentic workflows, tool-calling (function calling), prompt engineering, custom model endpoints, AI-assisted coding, model optimization techniques (exploring), machine learning basics

AI Tools: ChatGPT, Claude, GitHub Copilot, Microsoft Copilot, Gemini, Lovable (for coding, Python debugging, dashboard and KPI development, learning, research and problem-solving)

Marketing Web Development: Marketing Operations, landing pages, HTML email templates, ads promotion creation and design (banner and ads pages), digital marketing web content, content services, media growth pages, customer engagement pages, data and technology-driven pages, fast time-to-market

Quality, Testing & SEO: Cross-browser compatibility testing, browser DevTools, W3C validation, accessibility basics (alt text, ARIA, semantic tags), SEO basics (meta tags, headings, page speed), unit testing, JUnit, Mockito, MockMvc, Postman (API testing), debugging, troubleshooting, code optimization, lazy loading, code splitting, clean maintainable code, best practices, code documentation, design patterns

Security: JWT, bcrypt, role-based authorization, OAuth concepts

Data Analytics & Methodologies: Data Analytics, Data Science, EDA, Statistical Analysis, Quantitative Analysis, Trend Analysis, Deep-Dive Analysis, A/B Testing, Machine Learning, Financial Analysis, Google Analytics, Customer Segmentation (RFM, k-means), Customer Behavior Analysis, Consumer & Product Analytics, Generational Behavioral Insights, External Data Integration, Benchmarking, Revenue Optimization, Targeting Optimization, Data Storytelling, Business Insights

Data Engineering & ETL: ETL, Data Modeling, Data Mining, Data Extraction, Data Cleaning, Data Validation, Data Quality, Data Transformation, Pandas, NumPy, Big Data / Hadoop / Spark (exposure)

Visualization & Reporting: Power BI, Tableau, Advanced Excel, Excel, Microsoft PowerPoint, Dashboard Development, KPI Reporting, Decomposition Frameworks, Portfolio Performance Tracking, Reporting

Domain Exposure: Retail Banking (Credit Cards, Accounts, Transactions), Membership Services Analytics (Insurance, Lounge Access), Executive Assistant Support, Marketing Operations, Maps and Navigation (Map Layers, Local Geometry (LG), Important Roads (IR), Intersections & Highways (IS), Navigation Services, Search Services, End-to-End Processes), CRM / ERP

Retail Banking & Customer Support: Technical Support Process, Client & End-User Query Resolution, Troubleshooting & Diagnosis, Customer Service, Product Features & Disclosures, Service Agreement Compliance, Process SLAs, Meeting SLAs, Escalation Management, Ticket/Case Tracking, Call & Email Log Analysis, Query Documentation, Knowledge Base & FAQ, Self-Help Documents, Call-Backs & Follow-ups, Quality Standards, Productivity Tracking, Customer Feedback / Pulse Score

Executive Assistant & Business Support: Expense Claims Support, Statement Reconciliation (American Express), Travel Itinerary Creation, Meeting Room Booking, Calendar Management, Out-of-Office Email Handling, Ad Hoc Requests & Queries, Holiday & Sickness Cover, Support to member firm EAs, Ad Hoc Projects for Senior Directors & Associate Partners, Travel & Expenses Policy Compliance, Filing & Record Keeping (Microsoft Teams folders), Quality Assurance

Service & Process Management: Ticket / Request Management (ServiceNow - ESS Service Portal concepts), SOPs, Process Maps, SIPOCs, Training Manuals, Service Documentation Updates, Internal Tools, High-Volume Tasks, Timely Delivery, Quality Delivery, Stakeholder Management, Cross-Functional Collaboration, Agile/Scrum

Microsoft Office & Tools: Word, Excel, Advanced Excel, PowerPoint, Outlook, Microsoft Teams, Git, GitHub, Postman, Maven, npm, VS Code, Vercel (deployment), cloud deployment, basic cloud concepts, Computer and Internet Skills

Core Fundamentals: OOP, functional programming concepts, Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks (CCNA modules), software design principles, Software Engineering, SDLC, Agile/Scrum (coursework), business automation and process improvement

Professional Skills: Problem-Solving, Creative Problem-Solving (thinking outside the box), Analytical & Logical Thinking, Attention to Detail, Planning & Prioritisation, Multi-tasking, Time Management, Organisational Skills, Using Own Initiative, Self-Starter, Quick Learner, Learning Agility, Adaptability, Receptive to Feedback, Written & Verbal Communication, Courteous & Professional Approach, Building Rapport & Relationships with Partners, Directors, Senior Directors & Staff, Teamwork, Team Player, Coordinating Across Teams, Resilience, Integrity, Working in Diverse & Inclusive Teams, High-Energy, Going the Extra Mile, Following Guidelines, Solving Routine Problems

PROJECTS

Full Stack, AI & Software Development

E-Commerce Application with AI Features (MERN Stack) | *HTML5, CSS3, React.js, Redux, Node.js, Express.js, MongoDB, JWT, OpenAI/LLM APIs, Generative AI*

- Built a responsive, customer-facing, component-based web application with product listing pages, shopping cart and order management system using React.js, Redux and CSS3.
- Developed RESTful APIs with Node.js and Express.js for product CRUD operations and order processing; implemented JWT-based authentication and role-based authorization for secure user and admin access.
- Designed a secure checkout flow with form handling, client-side validation and payment gateway integration.
- Optimized front-end performance and removed bottlenecks across devices and browsers using React lazy loading, code splitting and Redux global state management, reducing page load times.
- Integrated Generative AI features: AI-powered product search for smarter discovery and an AI chat assistant (LLM APIs) to answer customer queries.

AI Agent Assistant with Tool-Calling (LangChain, FastAPI, React + TypeScript) | *Python, FastAPI, LangChain, OpenAI API, React, TypeScript, Git*

- Built an agentic workflow where an LLM plans tasks and calls custom tools (search, database lookup, calculator) through tool-calling, orchestrated with LangChain.
- Developed FastAPI back-end endpoints exposing the agent over REST, with request validation, streaming responses and error handling.
- Created a responsive React + TypeScript chat interface with typed components, showing tool-call steps and conversation history.
- Added prompt templates and basic evaluation of responses to compare models and tune prompts for quality and cost.

AI-Assisted Developer Productivity Tool | *Node.js, Express.js, React, LLM API, MongoDB*

- Built a tool that uses an LLM to explain code, suggest fixes and generate unit tests, exploring AI-assisted coding practices to speed up development.
- Designed Node.js back-end APIs and a React front end; stored prompts and results in MongoDB for reuse.

Task Manager REST API | *Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt, Postman*

- Designed and developed a production-ready RESTful API with full CRUD operations for task management, supporting business automation of task workflows.
- Integrated MongoDB via Mongoose for efficient, structured data storage, indexing and retrieval.
- Implemented JWT authentication, bcrypt password hashing, input validation and error-handling middleware across all endpoints.
- Unit tested, debugged and verified all endpoints and edge cases with Postman for reliability and performance.

Expense Tracker REST API (Java) | *Java, Spring Boot, JPA, JUnit, Mockito, MockMvc, Swagger/OpenAPI, Maven*

- Developed a RESTful Java service to collect, analyze and summarize expense data (business problem analysis) with CRUD, category filtering and summary endpoints, using layered OOP design (controller, service, repository).

- Documented the API with an OpenAPI/Swagger specification for clear request and response contracts.
- Added request validation and centralized exception handling to return consistent error responses.
- Wrote JUnit/Mockito unit tests and an end-to-end MockMvc integration test to verify service logic and API behavior.

Real-Time Weather Forecasting Application | *HTML5, CSS3, React.js, JavaScript, Axios, OpenWeatherMap API, React Hooks*

- Built a responsive, mobile-first web app with custom CSS that shows real-time weather through city search, consuming the OpenWeatherMap REST API.
- Implemented dynamic display of temperature, humidity, wind speed and weather conditions.
- Managed application state with React Hooks (useState, useEffect) and used Axios for HTTP requests; handled failed API calls and invalid city names with clear user messages.

Weather Forecast Web App (Angular) | *Angular, TypeScript, RxJS, Angular CLI, HttpClient, Open-Meteo REST APIs, HTML5, CSS3, Git*

- Built a responsive, component-based Angular app (standalone components, typed models, service layer) with city search, current weather and a 7-day forecast.
- Used RxJS operators (debounceTime, distinctUntilChanged, switchMap, catchError) for a typeahead search that cancels stale requests and handles loading and error states; created with Angular CLI.

Weather Forecast Mobile App (Flutter) | *Flutter, Dart, REST APIs, http package, Material 3, Git*

- Developed a cross-platform mobile app in Flutter (Dart) with city search, current conditions and a daily forecast list, consuming REST APIs through a dedicated service layer.
- Implemented stateful widgets, async/await networking, JSON parsing into typed models, and error and loading handling.

Data Analytics & Business Intelligence

Sales Data Analysis Dashboard | *Python, SQL, Excel, Power BI*

- Performed data extraction, cleaning, transformation and validation on 10,000+ sales records using SQL and Excel, handling high-volume data with high attention to detail to expose revenue trends, revenue drivers, top products, regional performance gaps and revenue optimization opportunities.
- Built an interactive Power BI dashboard tracking revenue, growth and category KPIs, reducing manual reporting time by ~5 hours/week and identifying top categories contributing ~70% of revenue.

Customer Churn Analysis | *Python, SQL, Power BI/Tableau*

- Cleaned, validated and analyzed customer data with Python and SQL, troubleshooting data issues, isolating behavioral factors most associated with churn and improving data accuracy by ~15%.
- Developed Power BI/Tableau dashboards segmenting customers by churn risk, translating findings into retention recommendations and targeting for ~20% of at-risk customers.

Expense Tracker Data Analysis | *Excel, Python, Power BI*

- Standardized, categorized and validated transaction records using Excel and Python, uncovering monthly spending patterns and recurring cost drivers.
- Built Power BI KPI reports highlighting high-expenditure categories, identifying potential savings of ~12% through data-driven budget insights.

Credit Card Customer Segmentation & Spend Decomposition | *SQL, Python, Power BI, PowerPoint*

- Segmented credit card customers by spend, tenure, engagement and age-based generational cohorts (Gen Z, Millennial, Gen X) using SQL and Python (RFM, k-means) on a public dataset to profile behavioral differences and identify targeting opportunities.
- Built a Power BI dashboard with a decomposition framework (customers x spend per customer), benefit-usage tracking and portfolio performance, and presented recommendations to stakeholders in a PowerPoint deck, communicating clearly with cross-functional partners.

Card Member Benefit Usage & Portfolio Benchmarking Analysis | *SQL, Python, Excel, Power BI*

- Benchmarked segment-level spend, engagement and benefit/membership-service usage against portfolio averages, validating and enriching a public dataset with external data to identify revenue optimization opportunities and performance drivers.
- Defined rule-based engagement triggers (inactivity, declining spend) and targeting criteria for customer engagement, and summarized trends as a data story with action steps for quality-focused decisions.

Retail Banking Customer Query & SLA Compliance Dashboard | *SQL, Python, Excel, Power BI*

- Analyzed a public banking complaints dataset (CFPB) to classify client queries by product, issue, channel and resolution status.
- Built a Power BI dashboard on cases resolved per day, process SLA met vs. breached, escalation rate and customer feedback / pulse-style score.
- Defined red-flag rules (ageing or reopened cases) for timely escalation to the team leader.

Call & Email Log Trend Analysis with Knowledge Base / FAQ | *Python, Pandas, SQL, Excel*

- Documented query logs (end-user details, issue, steps taken, outcome) and analyzed the most frequent issues to prevent repeat problems.
- Prepared a troubleshooting guide and self-help FAQ for top card, transaction and account-access queries to speed up resolution.

Business Operations & Support

Expense Claim & Statement Reconciliation Tracker | *Excel, Python, Power BI*

- Standardized and categorized transaction records to support expense claim checks and statement reconciliation, flagging mismatches and recurring cost drivers in line with expense policy.

- Built Power BI KPI reports highlighting high-expenditure categories, identifying potential savings of ~12% through data-driven budget insights.

Travel Itinerary & Meeting Room Booking Planner | *Excel, Outlook, PowerPoint*

- Created a planner to prepare travel itineraries and manage meeting room bookings for multiple senior stakeholders, avoiding clashes through calendar and priority checks.
- Prepared templates for itineraries, booking confirmations and professional correspondence to ensure timely, accurate and policy-compliant delivery.

Service Request Ticket Tracker & SOP Documentation | *Excel, Word, Microsoft Teams*

- Designed a request/ticket tracker (ServiceNow-style) to log, prioritise and close ad hoc queries and tasks for senior directors within agreed timelines, filing all deliverables and correspondence in structured Teams-style folders for quality assurance.
- Documented the end-to-end workflow as an SOP, Process Map and SIPOC, and maintained training-manual updates as the process changed.

EDUCATION

Master of Computer Applications (MCA) | G.L. Bajaj Institute of Technology and Management, Greater Noida, Uttar Pradesh | Sep 2024 – May 2026 (Regular, Full-Time)

Coursework: Computer Science fundamentals, Data Structures & Algorithms, DBMS, Operating Systems, Web Technologies, Software Engineering

Bachelor of Computer Applications (BCA) | Chandigarh University, Mohali, Punjab | Oct 2021 – May 2024 (Regular, Full-Time)

Strong foundation in computer science, programming and application development. Provisional Certificate and Consolidated Marks Memo available on request.

CERTIFICATIONS

- Google Data Analytics Professional Certificate – Google (Coursera)
- Microsoft Power BI Data Analyst (PL-300) – Microsoft Learn
- SQL for Data Analysis – Mode Analytics (Coursera)
- Tableau Desktop Specialist – Simplilearn
- Python for Data Science and Machine Learning Bootcamp – Udemy
- React JS – Infosys Springboard
- React Native – Infosys Springboard
- Kotlin Programming – Infosys Springboard
- Big Data 201 – Infosys Springboard
- Advertising With Meta – Infosys Springboard
- Building Web Applications in PHP – Coursera
- Building Database Applications in PHP – Coursera
- Introduction to Industry 4.0 and Industrial Internet of Things (IIoT) – Swayam (NPTEL)
- CCNA: Introduction to Networks – Cisco Networking Academy
- CCNA: Switching, Routing, and Wireless Essentials – Cisco Networking Academy
- CCNA: Enterprise Networking, Security, and Automation – Cisco Networking Academy
- Python Essentials 1 – Cisco Networking Academy
- Python Essentials 2 – Cisco Networking Academy
- Introduction to Cybersecurity – Cisco Networking Academy

ADDITIONAL INFORMATION

Languages: Hindi, English

Availability: Immediate joiner; open to relocation (including Hyderabad), on-site work from office and rotational shifts; comfortable with 2 PM – 11 PM shift timings
